ApeosPort-V 3065 / 3060 / 2060

A variety of options with a variety of combinations.
Flexibly adapting to any installation space.

Optional Functions

① Finisher-A1
Staple

② Finisher-B1
Staple 2-hole punch

③ Booklet Maker Unit for Finisher B1
Staple 2-hole punch+saddle staple

④ 1 Tray Module

⑤ 1 Tray Module with Cabinet

⑥ 3 Tray module

Convenient inner output tray, bypass tray that can be used to print on envelope

The inner output tray and optional side tray allow you to switch output trays for copy, fax, and print jobs.

The bypass tray is convenient for printing on envelopes used when sending delivery notes and invoices.

More efficient use of multifunction device

Easy Fingertip Control.

The new ApeosPort-V series take advantage of technology seen in smartphones and tablets by enabling users to operate the devices intuitively, for faster and more efficient production. Four different gestures – tap, double-tap, drag and flick – can be used to scroll and switch functions smoothly and quickly.

* Pinch in and pinch out operations (zooming in/out with two fingers) are not supported.

Clear printout

Faithfully reproduce detailed figures in high-quality 1200 x 1200 dpi resolution.

Faster scan

A monochrome multifunction device equipped with high speed colour scanner. Large volume paper documents can be turned into electronic form easily with the use of Duplex Automatic Document Feeder.

Scan data can be converted to DocuWorks document or PDF when sending as e-mail or storing in PC. Also available are functions such as OCR* useful for search, compression to reduce communication load, and password to provide security. Scanned data can be saved directly to USB memory.

* Optional.

Two easy-to-use scan applications are available

Scan Auto (personal use)

Automatically send scanned file to yourself. No need to worry about setting because scan settings are automated.

By task Scan Delivery (group use)*

Press a button specific to the type of document and send the scanned file to the specified storage destination. The administrator configures in advance so there is no need to configure individually.

* Optional.

Easy operation from “Simple” windows

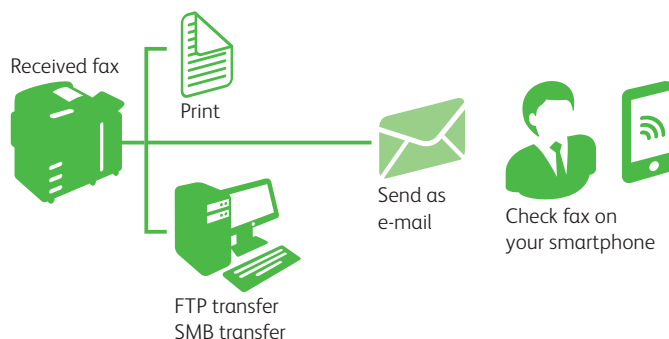

“Simple Copy” and “Simple Fax” windows are available to easy operation. This operation by showing only the basic settings. Easier to read with 5 mm font.

Waste-free fax

[Reception]

Received fax documents are stored in a folder and you can view their thumbnails to print only the necessary documents. This reduces unnecessary print out. Once a fax is stored in a folder, you can send it by mail or transfer it to a shared folder in addition to printing. You can even check the content of your fax on your smartphone while on the go.

[Sending]

Direct Fax (sending fax directly from PC) can also be used. Sent fax documents can also be saved as PDF and sent as e-mail attachments.

[Reject]

Allows administrators to block incoming faxes from certain numbers and anonymous numbers.

Supports secure and waste-free output

Print jobs are stored in the storage device of the multifunction device and output only after authenticating. This prevents uncollected print output and print error. You can also set the number of copies or change the print settings such as from 2 to 1 sided or color to monochrome mode during output. Thus reducing error, waste, and TCO.

* Requires use of authenticate mode.

Authentication using IC card

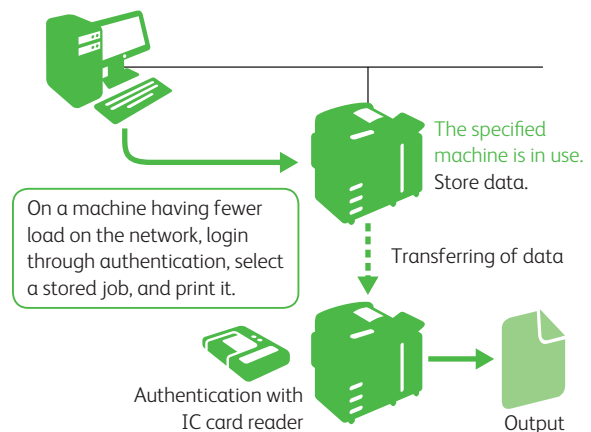

The authentication function can be used to restrict unauthorized users from accessing the multifunction device. You can also check each user's usage from the job log. Authentication using an IC card is also possible by adding an IC card reader to the multifunction device.

Efficiently utilize multiple multifunction devices

Printable from Any Machine on Demand

After a job has been sent to the device, users can choose the "Server-less On-demand" feature to print it from any machine on the network on demand, simply by logging on to the machine. Even if the selected device is in use, users can choose their job from another machine and print it. No dedicated server is required for this feature. It is also possible to use up to five devices in this way by grouping them – for example, by floor or workgroup.

* Optional.

Easy printing wherever you are

Print Utility for iOS / Android

This free Fuji Xerox application lets you output web pages, pictures, DocuWorks and PDF documents^{*1}, and import scanned documents to mobile devices. You can configure it to print N-up and duplex. Server-less On-demand printing^{*2} is also available by assigning authentication information. Additionally, the application is supported by standard printing frameworks on Android™ OS 4.4 or later. More applications allow output using Print Utility for Android.

* Print Utility can be downloaded for free from the App Store (iOS) or Google Play™ (Android).

*1: Outputting DocuWorks and PDF documents requires DocuWorks Viewer Light for iPhone/iPad or DocuWorks Viewer Light for Android.

*2: Optional.

Google Cloud Print

By registering the multi-function device with Google Cloud Print, you can output documents via the cloud from Android™ devices, Chromebook™ and computers. Giving permission to office visitors provides them with a printing environment without connecting to your Intranet.

* Google Cloud Print is a web printing service from Google.

Wi-Fi Direct®

Wi-Fi Direct® can be used with a wireless LAN adaptor. You can connect personal mobile devices directly to the multifunction device then print. Using a wireless LAN access point allows you to separate connections from business mobile devices and computers on an Intranet.

* Optional.

AirPrint

Supports AirPrint, iOS and OS X standard print functions. You can output e-mails and documents created with Apple applications, including Safari, Map, Numbers, Pages and Keynote, and Microsoft applications such as Word, Excel and PowerPoint.

Mopria® Print

You can output on a Mopria-certified device from Mopria Print Service* installed on mobile devices without installing different printing applications of models or manufacturers.

* Mopria Print Service can be downloaded for free from Google Play™. (Android™ 4.4 or later)

Environmentally responsible

Excellent noise reduction performance through airflow design

Natural convection is used in addition to reducing the number of cooling fans and the fan is stopped completely during standby. This enables energy-saving and ultra-low noise during standby (3.3B¹). Also, the 6.7B² noise level during operation is hardly noticeable enabling installation on top or side of a desk with no problem.

* For ApeosPort-V 2060

*1: A-weighted sound power level (LwAd), A-weighted emission sound pressure level (LpAm) is 16dB. Measurement is ISO7779.

*2: A-weighted sound power level (LwAd), emission sound pressure level (LpAm) is 49dB. Measurement is ISO7779.

Using environmentally safe new materials

Facing the challenges of modern society such as global warming, petroleum resource depletion and food problem, Fuji Xerox is engaged in the research and development of environment friendly cellulosic bio-based plastics. The newly developed “woody non-edible biomass plastics” has more strength and flame resistance compared with the conventional petroleum-based plastics and enables reduction of CO₂ emissions. It is adopted also for some parts of new products.

“Smart Energy Management” for Specific Power Use

Power consumption and CO₂ emissions are reduced by supplying power only to the portion to be used depending on the used functions. For example, during scanning or fax transmission, no power is supplied to unnecessary output device.

Quickly reverting operation panel

The control panel becomes available about 3 seconds after pressing the power save button. Promoting environmental awareness without special consideration.

Energy-saving design consuming less than 1.0 W power during sleep mode

The newly adopted low-power controller and fax boards significantly improve power consumption during sleep. Energy efficiency is increased.

Sleep mode power consumption comparison (unit: W)

Cloud service connecting directly to the multifunction device

Directly accessible from the multifunction device linking with the Fuji Xerox's cloud service “Working Folder.” You can transfer scanned documents and received fax documents, and also output saved document. In addition to editing documents on the cloud in DocuWorks Desk, you can also view and edit them from your smartphone.

* Agreement to use the Working Folder service is necessary in order to use this function.

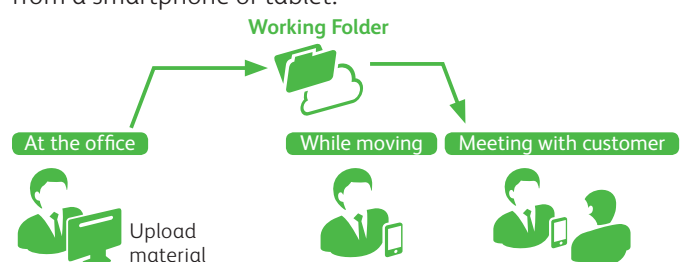

Quickly check received fax on the go

Automatically upload received fax to the Working Folder.

Efficiently perform business activities on the road through mobile coordination

Documents in the Working Folder can be accessed even from a smartphone or tablet.
